

PROJECT TITLE:

Student Marks Management System

LANGUAGE: Python

FEATURES:

- Add student
- Calculate total & average
- Show pass/fail result

CONCEPTS USED:

- List
- Loop
- Function
- If-else

```
students = []
```

```
def show_menu():  
    print("\n--- Student Marks Menu ---")  
    print("1. Add Student")  
    print("2. View Students")  
    print("3. Exit")
```

```
def add_student():  
    name = input("Enter student name: ")  
    m1 = int(input("Enter marks 1: "))  
    m2 = int(input("Enter marks 2: "))  
    m3 = int(input("Enter marks 3: "))
```

```
    total = m1 + m2 + m3  
    avg = total / 3
```

```
    if avg >= 40:  
        result = "Pass"  
    else:  
        result = "Fail"
```

```
    students.append([name, total, avg, result])  
    print("Student added successfully")
```

```
def view_students():  
    if not students:  
        print("No students found")  
    else:  
        for i in range(len(students)):  
            s = students[i]  
            print(i + 1, s[0], "Total:", s[1], "Avg:", s[2], "Result:", s[3])
```

```
while True:
    show_menu()
    choice = input("Enter your choice: ")

    if choice == "1":
        add_student()
    elif choice == "2":
        view_students()
    elif choice == "3":
        print("Exiting program")
        break
    else:
        print("Invalid choice")
```

main.py

Output

--- Student Marks Menu ---

1. Add Student
2. View Students
3. Exit

Enter your choice: 1

Enter student name: Riddhi

Enter marks 1: 45

Enter marks 2: 35

Enter marks 3: 55

Student added successfully

--- Student Marks Menu ---

1. Add Student
2. View Students
3. Exit

Enter your choice: 2

1 Riddhi Total: 135 Avg: 45.0 Grade: C

--- Student Marks Menu ---

1. Add Student
2. View Students

2. View Students

3. Exit

Enter your choice: 3

Exiting program
